ABOUT US

Founded in 2019 with over 30 years of industry knowledge and expertise, we specialize in the production of high-quality plastic packaging solutions. Our product range includes PET thermoformed goods, LDPE bags, shrink sheeting, and our exceptional cast film. We are dedicated to providing innovative and sustainable packaging solutions that meet the evolving needs of our customers.

The PET division, established in 2024, further expands our capabilities and allows us to offer a wider range of high-performance, eco-friendly packaging options. We aim to be a leading provider of sustainable and reliable packaging solutions, building strong partnerships with our customers and contributing to a more sustainable future. We are strategically placed in KZN, and transport our goods nationally.

Vision statement

We aim to be a global leader in sustainable plastic manufacturing, pioneering the development of closed-loop systems and revolutionizing the industry with eco-friendly materials and responsible production practices.

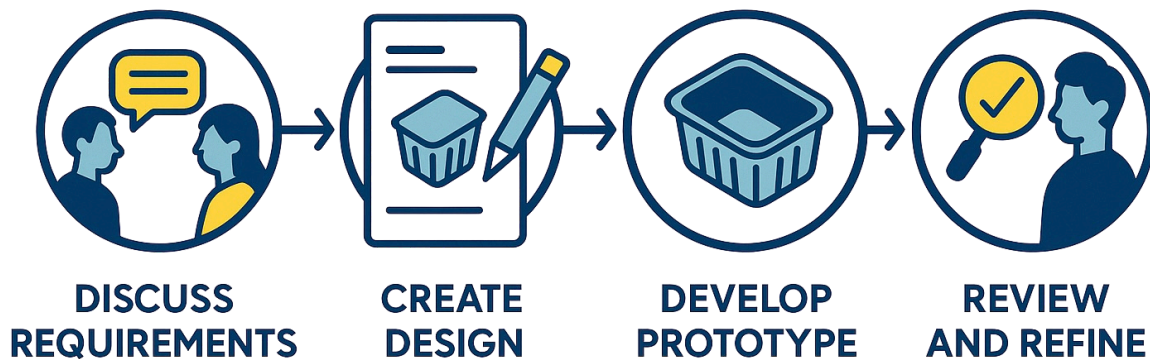

Mission statement

To be a leading provider of high-quality, user-friendly plastic products, manufactured with cutting-edge, sustainable technologies. We are committed to minimizing environmental impact by prioritizing waste reduction, maximizing the use of recycled materials, and fostering a circular economy through education and collaboration. We drive innovation in sustainable product design and manufacturing processes, while upholding ethical and socially responsible practices throughout our entire value chain.

COLLABORATION

Can't find the right packaging solution on the market? That's exactly where we come in.

At Buff Packaging, we believe that genuine innovation is born from collaboration. We don't just supply products, we build partnerships. By working closely with customers, designers, and industry experts, we co-develop custom PET thermoformed packaging solutions that meet both the functional demands and creative ambitions of your business.

Whether you're looking to launch a completely new product, improve performance, or solve a specific packaging challenge, our team is equipped to guide you from concept through to production. We take pride in listening closely, asking the right questions, and translating your vision into reality, all while ensuring technical excellence, brand alignment, and sustainability goals are met.

Every project is an opportunity to push boundaries, challenge assumptions, and deliver packaging that stands out, not only on the shelf, but across the entire supply chain.

Together, we can create something exceptional, something the market hasn't seen yet.

SUSTAINABILITY

At Buff Packaging, sustainability isn't a buzzword, it's the foundation of how we operate. As a leading manufacturer of PET thermoformed food packaging, we are proud to play a role in shaping a circular future for the retail industry.

We are transitioning our production to 100% recycled PET (rPET), a significant step in reducing our environmental footprint. By closing the loop on plastic use, we ensure materials are reused and repurposed, not wasted.

Our packaging solutions currently incorporate a thoughtful mix of:

- Virgin PET for performance-critical applications
- Pre-consumer recycled content from in-house recycling
- Post-consumer recycled PET (PCR) for maximum sustainability

Every brand has unique sustainability goals. That's why we work hand-in-hand with our clients to develop packaging that meets both environmental targets and performance demands, from maximising recycled content to ensuring recyclability without sacrificing visual appeal or shelf life.

Driven by innovation and collaboration, Buff Packaging is proud to support a circular economy, delivering smarter, greener solutions that help protect the planet without compromising on quality.

BUFF FORM

At Buff Packaging, we offer a versatile range of premium, rigid PET and PP packaging designed specifically for the deli, bakery, and fast-food sectors. While our standard product lines meet a wide variety of needs, we know that one size doesn't fit all.

That's why we collaborate closely with clients to create custom solutions, whether that means adapting existing designs or developing entirely new packaging. Our team is committed to turning your vision into functional, reliable packaging.

Combo Boxes

Our combo boxes include two packaging items that are designed to fit together perfectly, making procurement, and sales a breeze. Why complicate things?

CODE	DESCRIPTION	UNITS
BFC1	Cake dome (BFA2) & Cake base (BFA3) combo	50/50
BFC2	Large cake dome (BFA4) & Large cake base (BFA5) combo	50/50
BFC3	Rectangular dome (BFA7) & Rectangular base (BFA8) combo	50/50
BFC4	Log dome (BFA9) & Log base (BFA10) combo	50/50
BFC5	Tart dome (BFA11) & Cake base (BFA2) combo	50/50

Industrial Rolls

We also specialise in producing premium-grade PET rolls tailored for the commercial industry. Engineered for strength, clarity, and performance, our PET rolls are ideal for a wide range of thermoforming and packaging applications, offering a reliable foundation for high-volume production needs.

Whether you're in food packaging, retail, or industrial sectors, our rolls are manufactured to meet rigorous quality and hygiene standards, with options including virgin PET, pre-consumer recycled, and post-consumer recycled PET (rPET).

BUFF BAGS

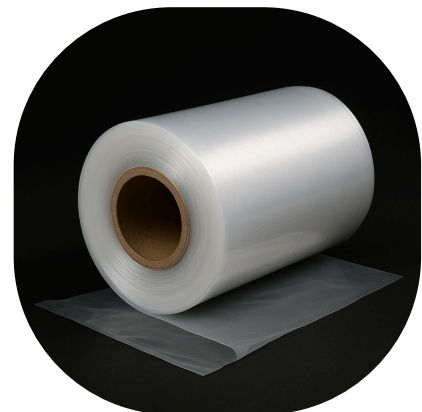

At Buff Packaging, we specialise in manufacturing high-quality custom LDPE bags, tubing, and sheeting designed to meet the specific needs of businesses across various sectors. Our products are trusted for their strength, flexibility, and consistency, offering dependable protection and professional presentation for your goods.

Using modern production equipment, we maintain strict quality control standards to ensure every product meets our clients' expectations for performance and durability. From food and retail to industrial and commercial use, our LDPE solutions are crafted to handle demanding applications with ease.

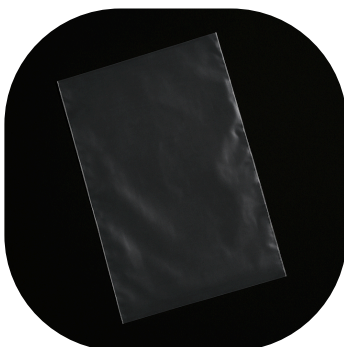

We focus on offering expert advice and attentive service from initial inquiry through to final delivery. Whether you need lightweight liners or heavy-duty sheeting, we help you choose the right material, size, and finish to suit your operation.

Why choose Buff Packaging?

- Custom sizing and thickness options
- High strength and tear resistance
- Food-safe and industrial-grade LDPE available
- Flexible low to high-volume production runs
- Fast turnaround and dependable delivery
- Personal service and expert support throughout

If you're looking for LDPE packaging that performs, protects, and delivers lasting value, Buff Packaging is your trusted partner. Get in touch today to explore how we can help your business.

BUFF WRAP

We are thrilled to present a revolutionary new standard in food-grade PVC film, setting a new benchmark for excellence in the industry. Our premium cast film is engineered with cutting-edge technology to deliver exceptional clarity, strength, and durability, surpassing all other options available in the local market. Sourced from world-leading manufacturers, this high-performance film is meticulously crafted to meet the most demanding requirements across a wide range of applications within the food industry.

Crystal-Clear Clarity: Unrivalled transparency for superior product presentation, ensuring your food items look fresh and appealing.

Exceptional Strength, Stretch & Durability: Engineered to withstand rigorous handling while maintaining integrity, reducing waste and improving efficiency. International

Accreditation: Compliant with global safety and quality standards, giving you confidence in every roll. Unparalleled

Quality: Precision-manufactured for consistent performance, ensuring reliability in every application. Guaranteed

Consistency: Exact micron thickness, length, and weight in every batch, eliminating variability and ensuring seamless operations.

Our cast film is available in the following sizes
